October 24, 2006 With the release of the first long term study of the effects of Ritalin on children aged 3 to 5 years, the ADHD debate has heated up again. Supporters of the study and of Ritalin use in young children interpret the results as saying this particular drug treatment is safe under certain circumstances; those who decry the use of an amphetamine like drug in youngsters read the study very differently. First, let's take a quick look at the diagnosis called ADHD, or Attention Deficit Hyperactivity Disorder.. Before approving your loan, a FHA mortgage lender will require an appraisal of the property you want to buy. An appraisal assures the lender that the house is worth the price you are paying for it.
